

Many restaurants and delicatessens in South Africa continue to serve or supply Foie Gras, with full knowledge of the cruelty it inflicts.

Those listed have all been contacted on several occasions and informed of the production method, and we have requested that their menu be amended or that they change their stock items. With one or two exceptions, there was no response at all to requests to refrain from serving or supplying FG forthcoming.

***Please help us continue to fight Foie Gras being served in South African restaurants by***

a) choosing another venue to support instead (see our Hall of Fame, for example)

b) mailing these establishments below, or calling them, and asking them to remove Foie Gras from their menus. We have not included contact details for these venues, as we are not advertising them.
